Please briefly outline how you intend to use your plot

--

Cultivating a plot can be hard work. On average during the growing season (March to October) people spend at least 5 and 12 hours per week working their plot, whilst from November to February it is between 2 and 6 hours per week. These figures are based on maintaining a well-kept plot.

EAGS expect plot to be 25% cultivated within 6 months of taking on a tenancy, 50% within 12 months, and 100% within 2 years.

Plot inspections are carried out regularly and continued non-cultivation of a plot can lead to termination of tenancy.

I am over 18 years of age and undertake to use the allotment plot allocated to me for my own personal use, solely for the purpose of non-commercial horticulture, and that all produce grown will be for my own use.

I agree to abide by the rules\* set out by EAGS

Signed		date	
--------	--	------	--

\*Available on request or to view on our website. A set of rules will be given to all new tenants.
